

Lake Oswego Skate Park Features

Check out our newly refinished 6 foot quarter pipe with a new and improved 7.5 foot extension! This ramp was recreated by Eagle Scout Ian Fisher
Thanks Ian and his crew for the new addition.

The Lake Oswego Skate Park offers 9600 sq. ft. of fun. It is comprised mainly of wooden ramps. The park is great for beginning boarders and inline skaters as well as challenging for experienced skaters of all ages. The park has a 4'x24' quarter pipe, 6-7.5ft. quarter pipe, new pyramid, 2 funboxes, 3 rails, 2 kickers, and a multipurpose box. In addition, there is a 3 foot half pipe

This pyramid has a variety of aspects and applications for beginners and advanced skaters. It can be skated as a pyramid hip, bank to ledge, ledge into a bank, kicker/bump, elevator ledge, as a mellow bank for technical grinds and slides, and much more! This custom pyramid and already existing half-pipe now fit together and form a cohesive obstacle, with way more flow and options to skate.
