

Water Treatment Plant

Our mission is to provide the citizens of Lake Oswego and surrounding areas with safe, pure, good tasting water at reasonable rates and adequate supply.

- - [About the Water Treatment Plant](#)

Construction is underway to upgrade the Lake Oswego Tigard Water Treatment Plant (WTP) located in West Linn. Lake Oswego's original water treatment plant was constructed in this location in 1968, in what was then unincorporated Clackamas County. The facility has treated Clackamas River water to high-quality drinking water standards for almost 50 years.

[Water Source and System](#)

Lake Oswego's source of water originates in the Clackamas River watershed. This high-quality water source receives runoff and snowmelt from a 940 square mile area located on the western slopes of Ollalie Butte, near Timothy Lake, in the Mount Hood National Forest.

[Treatment Process](#)

As part of the [Lake Oswego Tigard Water Partnership](#) project, Lake Oswego's water system has

been undergoing many changes and upgrades, including the water treatment process. The current treatment process, placed online in spring 2016, is conventional treatment using ballasted flocculation and granular activated carbon filtration.

- [Water Quality Reports](#)

We want you to know...

Since 2015, Lake Oswego has reduced paper providing the Annual Water Quality Report online. Cities are no longer required to send the reports in the mail. It is a great choice for everyone, and the planet.

- - [Treating Water in an Emergency Situation](#)

During an emergency, such as a major earthquake, the City of Lake Oswego may issue a "boil water notice" until it can verify that the water is not contaminated and is safe to drink. During a "boil water notice" period, any water used for drinking or food preparation should be boiled at a full rolling boil for at least one full minute.

Water Treatment Plant

Published on City of Lake Oswego Oregon Official Website (<http://www.ci.oswego.or.us>)

On April 11, 2008, the Oregon Water Resources Department issued a Final Order approving the City of Lake Oswego's first Water Management and Conservation Plan (WMCP or "Plan"). The purpose of the Plan is to guide the development, financing and implementation of water management and conservation programs and policies to ensure sustainable use, without waste, of publicly...

[Lead and Copper Sampling Study - Volunteers Needed August 2013](#)

The City of Lake Oswego is requesting volunteers to assist with a sampling program to collect samples of household drinking water to be analyzed for lead and copper. Sixty household sampling sites will be asked to sample once before the end of 2013 and again in the first six months of 2014.
