

What Services Do I Pay for and Get When Paying my Utility Bill?

Utility Bill payments pay for your consumption and use of the water system, sewer (wastewater system), surface water (carrying water away from streets, parking lots and yards in way that does not pollute our water), and use of streets. The money collected is also used to pay for operations, maintenance and [capital improvement costs](#) for the City's utility systems.

Through the bills customers pay, the City is able to provide clean, safe drinking water, safe streets for travel, and remove used water (sewer water) from your home. In order to do this in a legally sound, cost effective and efficient way which practices good stewardship of our financial and natural resources and environment, the City engages in different engineering, public works, financial management, and education programs.

Thank you for being a member of the Lake Oswego community and a ratepayer as well as for your value in quality and efficient services. Below are the direct services that are provided through City Utilities, all of which are in and make up the [Public Works Department](#). Administrative services, that serve both property tax and utility funded programs (such as Finance, Human Resources, Information Technology ... are not included in the links below).

-

-

[Lake Oswego Tigard Water Partnership](#)

Lake Oswego's key water supply facilities – the water intake on the Clackamas River and the water treatment plant in West Linn – are more than 40 years old. Over the years the City of Lake Oswego has continued to invest in its water supply system through upgrades, replacements, and maintenance. This has allowed the City to keep water rates low.
