[Are You Ready?](#)

Disasters disrupt thousands of lives every year. Each disaster has lasting effects, both to people and property.

If a disaster occurs in your community, local government and disaster-relief organizations will try to help you, but you need to be ready as well. Local responders may not be able to reach you immediately, or they may need to focus their efforts elsewhere.

### [Heat Wave](#)

In recent years, excessive heat has caused more deaths than all other weather events, including floods. A heat wave is a prolonged period of excessive heat, generally 10 degrees or more above average, often combined with excessive humidity. These conditions can be dangerous and even life-threatening for humans who don't take the proper precautions.

■ [Flood Insurance](#)

Everyone faces the risk of natural disaster and no plan to protect property can be complete without insurance coverage against potential damage and loss. It is important to know exactly what coverage you may need and what coverage is available to protect your

property against all of the natural hazards it may be exposed to so that you are not underinsured or not insured at all. Check with your...

Always be aware of your surroundings and have an exit plan. Knowing how and when to get out of a building is critical in an emergency situation.

- 

## [Active Shooter Response](#)

Active shooter or threat situations are unpredictable and evolve quickly.

Because active shooter situations are often over within 10 to 15 minutes, before law enforcement arrives on the scene, individuals must be prepared both mentally and physically to deal with the situation.
