Subject: SWEA thoughts and concerns

To Whom It May Concern:

I wanted to take a moment and provide my thoughts regarding the "Jean Way Extension".

I am concerned about the SWEA plan to rezone a property that would create the "Jean Way Extension". Doing so, would allow traffic to flow through a newly created street. If Lake Oswego is trying to create more employment areas, it is paramount that the maximum amount of square footage of land be available for newly created businesses to build upon. The "Extension" would seem like a contradiction to this plan as it would reduce the amount of land available to prospective businesses.

Also of concern to me is the amount of traffic between McEwan and 65th Avenue. I would appreciate if the commission would consider adding a "No Commercial Trucks" sign at the corner of 65th and Mcewan. The Mcewan Rd. goes towards Rivergrove Grade School and I would like to see commercial traffic limited as it is a school zone and already struggles with traffic issues during school hours.
