

Redevelopment Agency Projects

The Lake Oswego Redevelopment Agency (LORA) implements revitalization projects specified in the City Council-adopted East End Redevelopment Plan and Lake Grove Urban Renewal Plan. Each year the Agency adopts a budget authorizing specific expenditures consistent with adopted urban renewal plans.

Past East End projects include:

- **Parks and pathway projects**, including Millennium Plaza Park, Sundeleaf Plaza Park, and the Headlee Walkway.
- **Public/Private redevelopment**, including Lake View Village site assembly, associated relocation and construction of a new Main Fire Station, and public parking development.
- **Property acquisition** for parking and redevelopment projects, including Lake View Village and the First Street North Anchor.
- **Street and utility infrastructure improvement projects**, including A Avenue, First and Second Streets, Third Street Alley/pathway improvements, Leonard Street, 5th Street/A Avenue Pedestrian Crosswalk, North Shore/State Street intersection improvements, and sewer utility projects.

The Lake Grove Village Center Urban Renewal Plan was adopted in 2012. The Boones Ferry Road project will be the first priority of the district.
