

Grilling Safety

When the warmer weather hits, there's nothing better than the smell of food on the grill.

Three out of five households own a gas grill, which translates to a lot of tasty meals. But it also means there's an increased risk of home fires.

Each year an average of 8,800 home fires are caused by grilling, and close to half of all injuries involving grills are due to thermal burns. While nearly half of the people who grill do it year-round, July is the peak month for grill fires followed by May, June and August.

General Grilling Tips

- Propane and charcoal BBQ grills should only be used outdoors.
- The grill should be placed well away from the home, deck railings and out from under eaves and overhanging branches.
- Keep children and pets away from the grill area.
- Keep your grill clean by removing grease or fat buildup from the grills and in trays below the grill.
- Never leave your grill unattended.

Propane Grills

Before you use your grill for the first time each year, be sure it's in working order and ready to use. A [few simple guidelines](#) can help:

- Check the major connection points between the gas (propane) tank hose and the regulator and cylinder, and where the hose connects to the burners. Tighten if loose.
- Check the gas (propane) tank hose for the potential (gas) leaks. To do that:
 - Turn the propane tank on. Apply a light soap and water solution to the hose using a brush or spray bottle. If there is a gas leak, the propane will release bubbles around the hose (big enough to see).
- Once you've determined your grill has a gas leak by smell or by administering the soapy bubble test and there is no flame, turn off the gas tank and burners. If the leak stops at that point, get the grill serviced by a professional before using it again. If the leak doesn't stop, call the fire department immediately.
- If you smell gas while cooking, move away from the grill and call the fire department immediately. Do not move the grill.

Charcoal Grills

- There are several ways to get the charcoal ready to use. Charcoal chimney starters allow you to start the

charcoal using newspaper as a fuel.

- If you use a starter fluid, use only charcoal starter fluid. Never add charcoal fluid or any other flammable liquids to the fire.
- Keep charcoal fluid out of the reach of children and away from heat sources.
- There are also electric charcoal starters, which do not use fire. Be sure to use an extension cord for outdoor use.
- When you are finished grilling, let the coals completely cool before disposing in a metal container.
