

Pavement Management Program

JEFFERSON PARKWAY PAVEMENT PROJECT

Jefferson Parkway from Westlake Drive to Kerr Parkway will be paved soon.

A contractor will be hired to pave Jefferson Parkway this spring. Work is anticipated to begin in May with the majority of construction occurring during summer, when school is not in session. During construction Jefferson Parkway will be closed in segments as heavy equipment grinds down the existing road more than 16 inches deep, rebuilds a sturdy roadbed, and paves.

By the end of summer, neighbors will have nearly a mile of smooth new road, but the process requires your patience. We appreciate all neighbors abiding by traffic control signage and avoiding active construction areas for the safety of all.

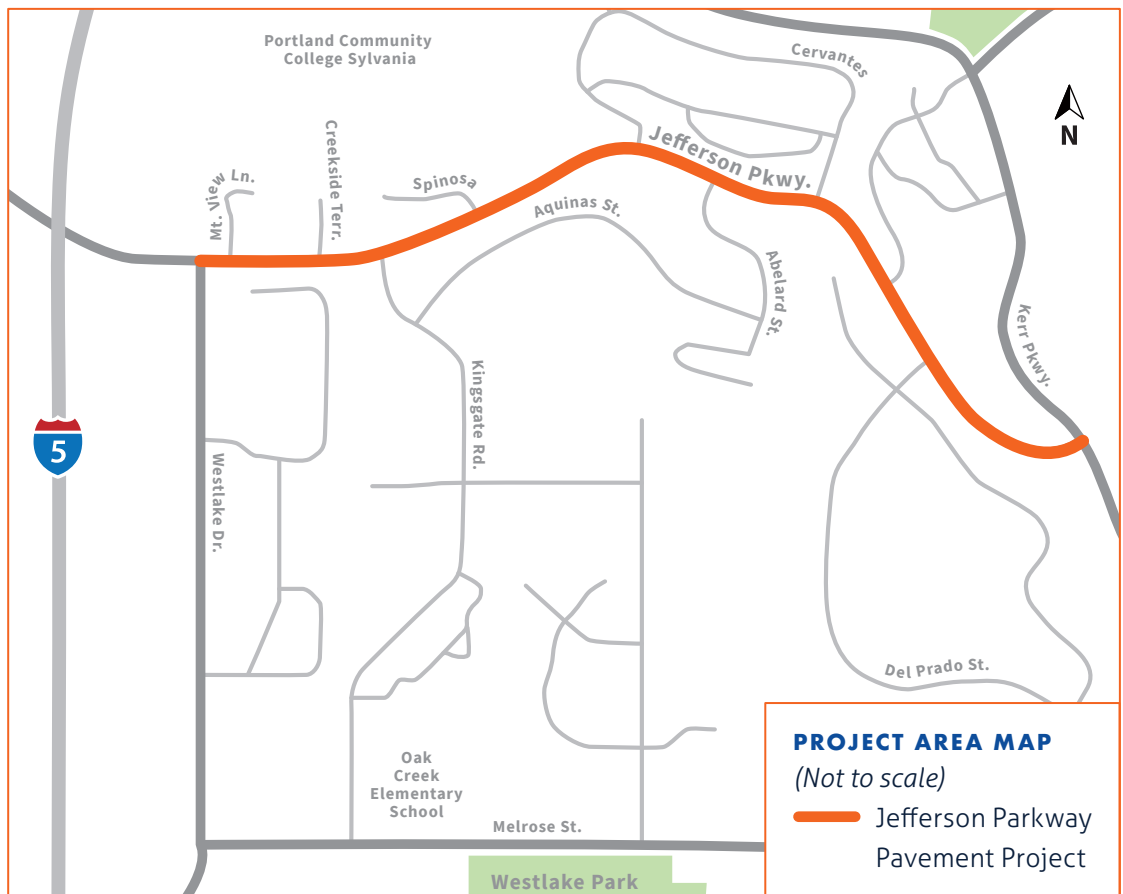

Current pavement conditions on Jefferson Parkway

Jefferson Parkway from Westlake Drive to Kerr Parkway will be paved in 2018.

Most of the work will occur between mid-June and late August and will require full closures of road segments.

The contractor will work closely with neighbors who need to access Jefferson Parkway.

What to Expect

Intermittent lane closures and summer traffic detours

MID-MAY TO MID-JUNE

Brief lane closures may occur during early curb-ramp installations and as the contractor prepares to dig up the existing pavement. The road will remain open until mid-June.

MID-JUNE — LATE AUGUST

(while school is not in session)

- Segments of the road will be closed to all traffic while the road is being ground up and the roadbed rebuilt.
- Residents and businesses will have access to properties. However, at times, segments of the road will not be passable and will be closed to all traffic. During rebuilding, segments of Jefferson Parkway will be dug out more than 16 inches deep, creating a dangerous drop-off that could damage vehicles.
- Neighbors will need to use signed detours to reach homes. This will cause temporary traffic increases on several neighborhood streets as the work area moves over the summer.
- A few streets have only one access point to Jefferson Parkway. Access will be carefully coordinated. Only residents on those streets will be allowed access.

WORK HOURS

Work hours are generally Mondays – Saturdays, 7 a.m. to 6 p.m.

Road closures with detours will be in place 24 hours per day when the road bed has been ground down and a street closure is in effect. At times, it will be unsafe to travel on sections of the road.

QUESTIONS OR CONCERNS

If you have questions or would like to receive periodic email updates during construction, please contact:

 City Construction

FIRE AND EMERGENCY SERVICES

Fire and emergency services will have access to the neighborhood.

MAIL, DELIVERIES, AND GARBAGE SERVICE

The City and contractor will help maintain neighborhood services, such as garbage service and mail delivery.

OTHER WORK YOU WILL SEE

- *Signs.* Street signs along Jefferson Parkway will be replaced and some additional safety signage will be added. All new street signs will meet city code for safety with retroreflective lettering. They will be easier to read at night.
- *Curb ramps.* The project will include replacement of existing curb ramps. There may be times when sidewalks or ramps are closed while concrete hardens. Because this is a pavement rehabilitation project, no new sidewalk will be added.
- *Striping.* For about two weeks after completion of the paving, the new road surface won't have permanent striping. The crews will appear done with their work, but will need to return to complete striping and finish cleaning up. Bicycle lanes will be striped.
