### **COUNTRY CLUB ROAD TO BE RECONSTRUCTED**

LAKE OSWEGO – Reconstruction of Country Club Road between Knaus Road and Boones Ferry Road will begin Monday August 13, 2007 at 7:00 p.m. The City of Lake Oswego required the contractor, Lakeside Industries, to conduct the repair work at night, given the high volume of traffic (24,000 vehicles per day) on this major city street. Construction will occur from 7:00 p.m. to 6:00 a.m., Monday through Friday, through August 30, 2007. During construction hours, one lane in each direction will be open. All driveways on Country Club will be accessible, however, streets with multiple outlets may at times, have one outlet blocked. Every effort will be made to minimize delays. During the day, all lanes will be open in both directions.

Country Club Road, a major east/west connection in Lake Oswego, will first require grinding two inches of asphalt, removal of base materials in some areas, reapplication of base materials, and paving with new asphaltic concrete. During the day, all lanes will be open in both directions, however, during the grinding phase, the road will be rough so drivers are asked to use caution. The work will generate noise, especially during the four-day grinding phase. Emergency vehicle access will be maintained.

An informational meeting regarding the project will be held on Thursday, August 9, 2007 at the Lake Oswego City Hall in the Council Chambers, 380 A Avenue, 6-7 pm.
