COMMERCIAL ALARM or SUPPRESSION SYSTEMS

These Applications are to be submitted online at:

<https://aca-oregon.accela.com/oregon/>

Dear Applicant;

On the permit application you must provide all **JOB SITE INFORMATION**. The permit application must be completed in its entirety, where a section of the application doesn't apply you must indicate (N/A). Please provide valuation of the project.

A permit with plans will be required for all fire alarm, fire sprinkler, fire line and fire suppression system work. Provide plans designed by a qualified person, illustrating calculations, device locations & all cut sheets.

FIRE ALARMS:

The system must be designed under the current adopted edition of NFPA 72 & other applicable codes.

- **5 Devices or less** can be submitted with an affidavit. You must include floor plan showing location of devices added or moved, the building permit application & completed affidavit. Make sure to include a comment on the online form that this is an affidavit.
- **Over 5 devices** require full submittal.
- **Fire alarm control unit/panel or communicator installation** requires full submittal.

FIRE SPRINKLERS:

The system must be designed under the current adopted edition of NFPA 13/13R & other applicable codes.

- **10 Heads or less** can be submitted with an affidavit. You must include floor plan showing location of heads added or moved, the building permit application & completed affidavit. Make sure to include a comment on the online form that this is an affidavit.
- **Over 10 heads** require full submittal.

UNDERGROUND FIRE LINES:

For underground fire line, provide plans from the vault inward. The system must be designed under the current adopted edition of NFPA 14 & other applicable codes.

HOOD SUPPRESSION SYSTEMS:

Provide plans illustrating the site with the pull station location. The system must be designed under the current adopted edition of NFPA 96 & other applicable codes.

PLEASE NOTE: PRIOR TO SCHEDULING INSPECTIONS, YOU MUST EMAIL THE
FIRE DEPARTMENT AT: fmo@ci.oswego.or.us

**FIRE SPRINKLER AFFIDAVIT FOR
ALTERATIONS UP TO 10 SPRINKLER HEADS**

(Without plan review)

Project Name: _____ Occupancy: _____

Job Address: _____ Suite: _____

Contractor: _____ Phone: _____

Date: ___/___/___ Number of altered heads (max 10): _____

Description of work: _____

I certify that the following is true and reasonably defines the scope of work for this project:

- A) Piping involves branch lines or piping directly connected to sprinkler heads or connected through arm-overs.
- B) There is no change in hazard classification or commodity configuration.
- C) Positions of sprinkler heads relative to architectural features such as soffits, beams, partitions, walls, etc. complies with the current adopted edition of NFPA 13.
- D) The proposed work does not require hydraulic calculations/does not create a newly hydraulically remote area.
- E) The area covered per sprinkler head is limited to the spacing requirements of NFPA 13.
- F) Tenant improvements in new light hazard occupancies shall be equipped with QR heads or meet conditions of 8.3.3.1 in the current edition of NFPA 13.
- G) The installation shall comply with the requirements of the current adopted edition of NFPA 13.
- H) Work shall not be covered until piping, hangers and bracing are inspected.
- I) Final approval shall be subject to onsite tests and inspections.

In addition, I understand the following is required:

- A sketch provided on the job site upon request of the inspector showing:
 - Locations of work within the building.
 - Placement of existing heads/devices in the area of work.
 - New locations if any existing heads/devices will be moved.
 - Locations and cutsheets for all new/added heads or devices.

A copy of this document shall be available for all inspections. The Fire Marshal’s Office reserves the right to require plans and calculations as determined during the field inspection.

Contact the fire department directly for inspection requests prior to scheduling through E-Permitting by sending an email to: fmo@ci.oswego.or.us

FIRE ALARM SYSTEM AFFIDAVIT FOR ALTERATIONS OR TENANT IMPROVEMENT
(Alarm Control Panel Replacement or Installation Not Eligible)
(Without plan review)

Building Permit No. _____ Date Received _____

Project Name: _____ Occupancy: _____

Job Address: _____

Contractor: _____ Phone: _____

Type of System: (check one) Required Non-required
(check one) Automatic Manual Both

Maximum number of devices added or moved under this permit process is 5 total per tenant space

No. of Proposed Smoke / Heat Detectors: To be Added _____ / To be Relocated _____

No. of Proposed Manual Alarm Stations: To be Added _____ / To be Relocated _____

No of Proposed Notification Appliances: To be Added _____ / To be Relocated _____

I, _____, Oregon Construction Contractors Board No. _____ certify the following is true and defines the scope of work for this project.

- a. All work complies with the current state-adopted NFPA-72 and the authority having jurisdiction.
- b. All notification appliances are located in accordance with the current state-adopted NFPA-72.
- c. Smoke/Heat detector spacing complies with current state-adopted NFPA-72 and the AHJ.
- d. Exposed wiring will not be covered until inspected.
- e. Final approval shall be subject to on-site tests and inspections.**
- f. Voltage drop is adequate to operate all appliances.
- g. Battery supplies are capable of supporting the system modifications.
- h. A statement of compliance, with the minimum information as specified in OFC Section 901.2.1, will be given to the building inspector prior to final approval.
- i. Compatibility of appliances and devices are in accordance with the FACP manufacturer’s specifications.

In addition, I understand the following is required:

- A sketch attached to this document and the building permit showing the area of work within the building’s structure, and
- A copy of this document shall be available for the authority having jurisdiction, and
- An electrical permit

At time of final fire department acceptance test these documents are required:

- As-Built drawings detailing the work performed
- NFPA 72 Record of Completion
- NAC EOL Voltage drop Calculations

When end of line notification circuit voltage is not calculated, alarm voltage measurements may be used. The difference between the measured source and end of line alarm voltages shall not exceed 4.4 volts.
