

- | | | |
|----|-----------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------|
| | Medium = | <0.5 miles, but not adjacent |
| | High = | Adjacent to a school or educational facility |
| b) | Feasibility of Access | |
| | Low = | No public access |
| | Medium = | Limited public access (<i>e.g.</i> , no identifiable road or path) |
| | High = | Public street or pedestrian way abuts site |
| c) | Educational Value: | |
| | Low = | Does not provide an urban setting for environmental learning opportunities, <i>i.e.</i> , does not rank high or medium in environmental values 1-4, above. |
| | High or Medium = | Provides urban setting for environmental learning opportunities, <i>i.e.</i> , must rank high or medium in environmental values 1-4, above. |

2. Social Value #2: Scenic Quality

Of the three following scenic categories, the site has a Salix ranking of "high" in at least one category, and "medium" or higher in at least one additional category:

- | | | |
|----|---------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| a) | Unusual or particularly attractive vegetation or features(s) ¹ | |
| | High = | Distinguishing vegetation or features present in abundance, or outstanding |
| | Medium = | Distinguishing vegetation or features present |
| | Low = | No distinguishing vegetation or features |
| b) | High Visibility for large number of people: | |
| | Low = | Not clearly visible from a major street (collector or above) |
| | Medium = | Clearly visible from a major street or public area |
| | High = | Clearly visible from a major arterial (I-205, Country Club, Road) or heavily used regional public facility |
| c) | Screening value (<i>e.g.</i> , incompatible or unsightly land uses): | |
| | Low = | No significant screening value |
| | Medium = | Screens incompatible land uses (<i>e.g.</i> , single and multiple family residential) |
| | High = | Is essential to providing effective screening between clearly incompatible land uses (<i>e.g.</i> , industrial and residential uses or residential and a major street) |

Social Value #3: Recreational Opportunity

Meets all of the following criteria:

¹ **Note:** Since this criterion is somewhat subjective, it is critical for the contractors to describe the particular vegetation or feature, and what makes them distinguishing. Moreover, this criteria, if applied as the sole reason for determining significance, should be carefully reviewed by the City Council.
