ORDINANCE NO. 2725

WHEREAS, the City has initiated a request to amend the Comprehensive Plan (Plan), the Community Development Code (LOC Ch. 50) (CDC) and the Transportation System Plan (TSP) to ensure consistency among the three documents; and

WHEREAS, the proposed amendments to the CDC, including adding a definition for Traffic Impact Study and criteria for when a study is required and the level of analysis required, are those recommended by the 2014 update of the TSP to implement the policies of the Connected Community Chapter of the Plan, and the amendments to the TSP include updating the Street Classification maps and adding projects from the recently adopted Southwest Employment Area Plan, a special district plan of the Comprehensive Plan; and

WHEREAS, notice of the public hearings relating to consideration of this Ordinance was duly given in the manner required by law; and

WHEREAS, a public hearing was held before the Lake Oswego Planning Commission on September 26th, at which the staff report, testimony, and evidence were received and considered; and

WHEREAS, a public hearing was held before the City Council of the City of Lake Oswego on December 6, 2016, at which the staff report, testimony, and evidence were received and considered;

The City of Lake Oswego ordains as follows:

Section 1. The City Council adopts the Findings and Conclusions for LU 16-0025, attached as Attachment “1.”

Section 2. As set forth in Attachments 2 through 4, the Comprehensive Plan, the Transportation System Plan and the Community Development Code, are respectively amended by deleting the text shown by strikethrough type and adding new text shown in bold, double underlined type.
Enacted at the meeting of the City Council of the City of Lake Oswego held on the 6th day of December, 2016.

BEFORE THE CITY COUNCIL

OF THE CITY OF LAKE OSWEGO

A REQUEST FOR LEGISLATIVE TEXT AMENDMENTS TO THE COMPREHENSIVE PLAN, THE COMMUNITY DEVELOPMENT CODE AND THE TRANSPORTATION SYSTEM PLAN

LU 16-0025

CITY OF LAKE OSWEGO

FINDINGS & CONCLUSIONS

NATURE OF PROCEEDINGS

This matter came before the Lake Oswego City Council on the recommendation of the Planning Commission for legislative amendments to the Connected Community Chapter of the Comprehensive Plan (Plan) and the Community Development Code (CDC) to implement the recommendations of the 2014 update of the Transportation System Plan (TSP). Amendments to the TSP are also proposed to ensure consistency among the three documents.

HEARINGS

The Planning Commission held a public hearing and considered this application on September 26, 2016. The Commission adopted its Findings, Conclusions and Order recommending approval of LU 16-0025 on October 10, 2016.

The City Council held a public hearing and considered the Planning Commission’s recommendation on December 6, 2016.

CRITERIA AND STANDARDS

A. Oregon Statewide Planning Goals

Goal 1: Citizen Involvement
Goal 2: Land Use Planning
Goal 11: Public Facilities
Goal 12: Transportation
B. Transportation Planning Rule (Chapter 660, Division 12)

C. Regional Plans

   Metro Urban Growth Management Functional Plan (UGMFP)

   Regional Transportation Functional Plan (RTFP)

D. City of Lake Oswego Comprehensive Plan

   Land Use Planning: Policy E-Comprehensive Plan Amendments

   Community Culture: Civic Engagement

   Connected Community: Goal C-Efficiency

E. City of Lake Oswego Community Development Code (LOC Chapter 50)

   LOC 50.01.003.3 Jurisdiction of Hearing Body

   LOC 50.07.003.16.a Legislative Decisions Defined

   LOC 50.07.003.16.b Criteria for Legislative Decision

   LOC 50.07.003.16.c Required Notice to DLCD

   LOC 50.07.003.16.d.iii Planning Commission Recommendation Required

   LOC 50.07.003.16.e City Council Review and Decision

FINDINGS AND REASONS

   The City Council incorporates the staff report dated September 15, 2016, and
   the Council Report dated November 8, 2016, with all exhibits, together with the
   Findings, Conclusions & Order of the Planning Commission, as support for its decision.
CONCLUSION

The City Council concludes that Ordinance 2725, as recommended by the Planning Commission, complies with all applicable criteria and should be enacted.
Updates to the Comprehensive Plan, Connected Community Chapter

Page 113
Lake Oswego Transportation System Plan

Lake Oswego’s Transportation System Plan (TSP) was first adopted in 1997, pursuant to the State Transportation Planning Rule (OAR 660, Division 12). The TSP was updated in 2014, in coordination with This chapter contains the goals, policies and recommended action measures of this chapter. This chapter and the TSP were for an update to the TSP, amended in 2016 to make corrections and clarify the text. The City is updating its plan pursuant to Statewide Land Use Planning (Periodic Review) requirements. Once the updated TSP is adopted, this chapter will be amended to incorporate any changes.

Page 116
Goal C. Efficiency (Policies)
C-1: Maintain arterial and major collector streets intersections at Level of Service (LOS) ‘E’ or better during peak hours to planned level of service standards, whenever practical.

ROADWAY MOBILITY STANDARDS

Agencies often establish mobility standards for intersections on their roadway network based on governing jurisdiction, functional classification and surrounding land use context. The mobility standards establish an agreed upon acceptable degree of average delay for motor vehicles and/or acceptable volume-to-capacity ratio. Mobility standards are typically defined for the weekday peak hour or peak period. The applicable mobility standards used for the TSP Update are summarized below.

- The City of Lake Oswego mobility standards are established in the current Comprehensive Plan under the Connected Community Chapter, Goal C-Efficiency Goal 12: Transportation, Goal 1: Major Streets System. The policy states arterial and major collector streets intersections shall be designed and maintained at Level of Service ‘E’ or better during peak hours.”

50.03 USE REGULATIONS AND CONDITIONS

50.03.003 Use-Specific Standards

///

3. Conditional Uses in the R-2 and R-6 Zones

///

d. Where available, a conditional use shall take access from collector or arterial streets and not from local streets. Exception: A conditional use may take access from a local street if a professional traffic evaluation analysis indicates that access to the local street would improve public safety or traffic management when compared to access from the available collector or arterial.

50.06 DEVELOPMENT STANDARDS

50.06.003 Circulation and Connectivity

1. ACCESS/ACCESS LANES (FLAG LOTS)

///

d. Standards for Access Lanes

///

v. Access lanes shall align with existing and/or planned streets or access lanes where practicable.

vi. All new or modified driveways shall follow access spacing as shown in LOC Table 50.06.003-2 Access Spacing, where practicable, and, as determined by the City Engineer, shall not create a traffic operational or safety conflict.

///

4. LOCAL STREET CONNECTIVITY

///

b. Purpose and Intent

The purpose of the connectivity standard is to ensure that:

i. The layout of the local street system does not create excessive travel lengths or limit route choices. This will be accomplished through an interconnected local street system to reduce travel distance, promote the use of alternative modes of travel, provide for efficient provision of utility and emergency services, provide for more even dispersal of traffic, and reduce air pollution and energy consumption;

///

iv. Local circulation systems and land development patterns do not detract from the efficiency of the adjacent collector or arterial streets;

///

vi. The Metro Urban Growth Management Functional Plan, Title 11, street connectivity requirements (Metro Code 3.07.630) are met;

///
viii. To guide land owners and developers on desired street and bicycle and pedestrian accessway-Transportation connections to the existing transportation system that will improve local access to schools, transit, shopping, and employment areas.

///

e. Standards for Construction

///

iv. Where a temporary street-end is created, it shall be stubbed to the property line and a sign shall be posted with posted notification identifying it as temporary and planned for future extension.

///

50.07 REVIEW & APPROVAL PROCEDURES

50.07.003 REVIEW PROCEDURES

1. APPLICATION

a. Application for Development

///

iii. Traffic Impact Study (TIS) Required

(1) The Purpose of a Traffic Impact Study is to:
   (a) Ensure that the existing and proposed transportation facilities in the vicinity of the proposed development are capable of accommodating the amount of traffic expected to be generated by the proposed development;
   (b) Protect future operations and safety of transportation facilities and major transit corridors, and implement the Comprehensive Plan and Transportation System Plan.

(2) The City Engineer shall require a traffic impact study when any of the following conditions are met:
   (a) The proposed development or site modification will generate at least 25 trips in the roadway peak hour traffic period or at least 250 daily trips, prior to applying trip reduction factors; or
   (b) The site is subject to a zoning map or text amendment or comprehensive plan or map amendment that increases the intensity (potential vehicle trip generation) of allowed uses; or
   (c) The daily use of the property increases by ten or more vehicles with a gross vehicle weight rating of 26,000 pounds or greater; or
(d) The traffic generated by a proposed development will result in a traffic volume increase that could potentially change the functional classification of an existing or planned transportation facility (e.g., traffic volume exceeds local street classification; or
(e) The City Engineer finds:
   i. the City or other roadway authority has documented traffic safety or operations concerns within the study area, such as frequent crashes, poor roadway alignment, limited sight distance; or
   ii. existing Level of Service of a nearby intersection is at or below LOS ‘D’; or
   iii. a proposed development is expected to alter traffic patterns on a local street or neighborhood collector within 1/2 mile of the subject lot such that access to individual properties or traffic safety is adversely impacted; or
   iv. the site lies within one-quarter mile of the ramp terminal of an Interstate freeway, as traveled along roadways.

(3) The traffic impact study shall be conducted by a registered Oregon Civil or Traffic engineer with special training and experience in transportation analysis and planning, and shall either follow the TIS Guidelines, approved by the City Engineer, or provide justification from a registered traffic engineer as to why the TIS Guidelines should not be followed in that instance. The City Engineer shall issue TIS Guidelines, which at a minimum shall address:

(a) Identification of the study area;
(b) Analysis of existing transportation conditions, including as applicable, Level of Service and safety deficiencies if any, on transportation facilities within the study area;
(c) Future conditions (trip generation and trip distribution) for the proposed development;
(d) Projected Levels of Service on intersections within the study area;
(e) Analysis of impacts from projected traffic on applicable surface modes of travel (vehicular, freight, bicycle, pedestrian, and transit), including as applicable Level of Service, safety, and capacity for streets within the study area;
(f) A recommendation of necessary transportation improvements or other measures to mitigate deficiencies identified by the TIS and ensure a Level of Service ‘E’ or better at peak hour traffic period for intersections within the study area, after the future traffic impacts generated by the development are considered.

The applicant’s engineer shall certify the TIS by providing a signature and engineer stamp or seal.

[Editor’s note: Add:
Cross-Reference: See City Engineer’s Traffic Impact Study (TIS) Guidelines.]
3. PUBLIC NOTICE/OPPORTUNITY FOR PUBLIC COMMENT

a. Written and Posted Notice for Minor Development

///

iii. Notice to Affected Roadway and Railroad Authorities Oregon Department of Transportation and the Affected Railroad Company

Written notice shall be provided to:

the (1) Oregon Department of Transportation and the affected railroad company if the application indicates that a railroad-highway crossing provides or will provide the only access to land that is the subject of the application; and

(2) a city or county or state where that jurisdiction’s boundary or transportation facility is within 1/2 mile of the boundary of the development site.

The City Manager may give additional notice of application to other governmental entities as deemed appropriate, e.g. TriMet.

c. Notice for Initial Public Hearing for Minor and Major Development

i. Notice of a public hearing before a hearing body containing the information required below shall be mailed at least 20 days before the initial public hearing as follows:

(1) To the applicant;

(2) To property owners in the same manner as provided in LOC 50.07.003.a.i;

(3) To neighborhood associations in the same manner as provided in LOC 50.07.003.a.ii;

(4) To the Oregon Department of Transportation Affected Roadway Authority or Jurisdiction and affected Affected railroad Railroad company Companies if:

(a) the application indicates that a railroad-highway crossing provides or will provide the only access to land that is the subject of the application; and

(b) a city’s or county’s or state’s boundary or transportation facility is within 1/2 mile of the lot; and

(5) Persons filing comments within any comment period: If the hearing regards an appeal of a City Manager decision on a minor development application, to any person not otherwise required to be notified by this section who submitted comments during the 14-day comment period.

ADOPTED 12/6/16
LU 16-0025 ATTACHMENT 4 (ORDINANCE 2725)/PAGE 5 OF 6
50.10 DEFINITIONS AND RULES OF MEASUREMENT

50.10.003 DEFINITIONS

///

2. DEFINITION OF TERMS

The following terms shall mean:

///

Access Lane
The area on private property that extends from the public right-of-way and is permitted to provide ingress and egress to the property (or properties) by applicable surface modes of travel.

///

Peak Hour
The one hour interval, in which the highest traffic volumes occur on a given roadway, during the traditional commuting peak periods of 7 a.m. to 9 a.m., 4 p.m. to 6 p.m., and also the time period(s) outside the traditional commuting peak periods for the particular land use that generates the highest traffic volume.

///

Traffic Impact Study
A report prepared by a professional engineer that assesses the impacts that a particular development’s traffic will have on the transportation system in the defined study area and provides an analysis of a proposed transportation solution, if needed.

///

Traffic Evaluation
A report or analysis, conducted by a qualified professional such as an architect, landscape architect, engineer, surveyor, as applicable, to examine the impact(s) to an aspect of the transportation system, i.e., determination of the location and configuration of an access, sight distance analysis, pedestrian crossing evaluation.
